DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 7-9, filed 7/1/04, with respect to claims 1-21 have been fully considered and are persuasive. The final rejection of 3/1/04 has been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Prior art fails to show a vibration wave device comprising an electro-mechanical energy conversion elements which selectively excite in the vibration member three different types of bending vibrations, each of which respectively displaces in a direction in parallel with the two orthogonal planes; and a driven member which is brought into contact with driving portions of the vibration member and driven by vibrations excited in the vibration member. Prior art also fails to show, a vibration member having a electro-mechanical energy conversion elements which are fixed to a surface of the plate member which is opposite the surface from which the projection protrude. Prior art also fails to show, the vibration member having three bending vibrations having the same displacement direction but mutually different nodes positions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
